

## Side Access Filter Housings

### APPLICATIONS

Suitable for the majority of air filtration applications where easy side access is required for filter replacement.

### CONSTRUCTION

Filter housings are generally manufactured in galvanized steel, however they can also be produced in alternative materials such as stainless steel or aluminium.

Alternatively finished in specified colours or finishes.

The housings are individually designed to ensure they meet each and every site requirement.

This product can be fireproofed if required

- Easy filter access
- Single or double side access available
- Full specification & Design service
- Dimensionally infinitely variable
- Can accept all filtration types
- Numerous applications
- Free Design Service
- Made in Britain

Side Access filter housings are custom designed to suit the specific requirements of the application and the site.

Additional components can be designed into the housing and subsequently installed including:-

- Transformation sections
- Insulation
- Differential pressure measurement & switching
- Tapping points
- Grilles & diffusers
- Viewing panels
- Dampers & Fire dampers
- Supports
- Lifting lugs etc.

Please note: In their continuous search for product improvement Westbury reserve the right to change materials and specifications without prior notice.
