

PRODUCT DATA SHEET

MESH GREASE FILTER

APPLICATIONS

Westbury’s mesh grease filter range has been specifically designed to efficiently remove grease and cooking oils from exhaust air in catering applications. The product is robustly constructed for long life, whilst providing an intricate labyrinth to ensure optimum efficiency.

CONSTRUCTION

The product is available manufactured in aluminium, galvanised or stainless steel. The crimped knitted wire pad is retained in specially formed channel with protective welded mesh faces. Handles are fitted centrally, normally on the face of the two shortest sides. The assembly is mechanically closed with rivets to ensure optimum strength and durability.
